

Detail Upgrade

QOTO

other

1. Bearing

Rolling bearings with extremely high precision are more wear-resistant than ordinary bearings, with higher precision and longer service life.

QOTO

other

2. Dial ring

With multi-angle design, it can be switched at any angle when switching between manual and electric.

QOTO

other

3. Clutch

The clutch inner diameter is designed with 4 convex grooves to ensure that the output shaft is more compact when working up and down. The stop is directly connected with the clutch, ensuring that manual operation is not shaken and more stable.

QOTO

other

4. AC contactor

The use of the well-known German brand ABB AC contactor, not easy to damage the contacts, longer life, is currently the world's highest-end brand.

QOTO

other

5. Absolute encoder

The output signal part adopts an absolute encoder, which has precise display, high precision and high stability.

QOTO

other

6. worm gear

The turbine material is made of all-copper material, the electric is connection with the turbine. The actuator can be used forever when it rotates.

QOTO

other

7. worm

The worm is processed two times by finishing, which is more precise than ordinary worms.

QOTO

other

8. Motor

Built-in overheat protection switch prevents overheating and damages the motor, making the machine last longer.

QOTO

other

9. Oil seal

Use the high-end brand Taiwan TTO.

QOTO

other

10. Hydraulic oil, Butter

hydraulic oil is more lubricious, anti-corrosive, rust-proof and wear-resistant than other brands.
